

**ROBBE & BERKING**

— S E I T 1 8 7 4 —

In 1874, Nicolaus Christoph Robbe opened his first small workshop in Germany's northernmost harbour city, which began its first dynamic upswing a little later when his son-in-law, Robert Berking joined the company.

150 years later, the small  
manufacture has become  
a world-renowned silver  
specialist for the finest  
silverware. Today, 200  
people work in our  
artisanal workshops.

And just as the manufactory has made its mark on the world for 150 years, ROBBE & BERKING will take you on a journey around the world.

The journey begins in the mecca of mid-century style, *Palm Springs*. Today, more than ever, this era is inspiring designers around the world with their interior concepts.

An absolute classic of ROBBE & BERKING history is coming back – *Metropolitan*. Like no other pattern it embodies the flowing and organic lines that characterized the middle of the 20th century. Many of the classic Mid-Century designs have become true design icons. The Modern Classic!

ROBBE & BERKING

ROBBE & BERKING

From Palm Springs, the anniversary trip continues to ice-loving *Bologna* during the summer. Here it's all about frozen perfection. Anyone can make ice cream. Making good ice cream is an artisanal skill. No one knows this better than the Italians.

Paired with a cream-colored version of THE BOX for cutlery and for champagne flutes as well as a crumble bar, this travel section heralds the start of summer.

In autumn, it's back to where it's always best – *home*. In 2020 ROBBE & BERKING had created one of the most valuable chess sets ever made.

Several other games will follow during fall,  
guaranteeing unforgettable family evenings.

*Welcome Christmas 2024!*

Last but not least, we are expanding  
our *Martelé Collection*.
